KUHN FC 3515 D Mounted Mower Conditioner

Kuhn North America, Inc. is excited to introduce the KUHN FC 3515 D mounted mower conditioner. With an 11'5" (3.5 m) overall working width, this mower conditioner can be either a stand-alone rear mounted mower conditioner or paired with a front mounted mower conditioner to complete the package. The FC 3515 D features the heavy-duty Optidisc® Elite cutterbar, utilizing a through-bolted design and is lubed-for-life. The operator has the flexibility of the two-speed DigiDry® finger conditioner to condition to optimal forage moisture. To ensure safe road travel, the FC 3515 D features 126° vertical folding to increase stability as well as lowering the overall height. This machine incorporates many industry-leading features customers expect, including the non-stop breakaway system, Lift-Control® hydro-pneumatic suspension and FlexProtect™ side shields.

The machine incorporates the heavy-duty Optidisc Elite cutterbar utilizing a through-bolted design and is lubed-for-life. The cutterbar has a slim profile, enabling a short cut, while the flat cutterbar angle to reduces the amount of soil contamination in the crop and prolongs blade life.

The Non-Stop Breakaway system allows the mower to simultaneously move back and up when it encounters an obstacle in the field, passing over it. The hydraulic safety system then automatically resets the mower to its original mowing position while combined with ground pressure. The FlexProtect side shields prevent damage when encountering obstacles while mowing near borders. They also allow for close cutting along field edges.

The FC 3515 D contains the Lift-Control hydro-pneumatic suspension system. This suspension system offers operators easy adjustability for faster operation. The suspension helps lower ash and soil incorporation by closely following changing terrain, with the opportunity for less wear on components.

Kuhn North America, Inc., of Brodhead, Wisconsin, is a leading innovator in agricultural and industrial equipment. KUHN offers a broad range of hay and forage, livestock, and crop production tools, as well as landscape and road maintenance equipment. KUHN, KUHN Knight and KUHN Krause products are sold by farm equipment dealers throughout the United States, Canada and many other countries.
