### **KUHN MM 950 & 1090 Merge Maxx® Commercial Hay Mergers**

Kuhn North America is excited to introduce the KUHN Merge Maxx® MM 950 & 1090 commercial hay mergers. With up to 36' (11 m) of working width, these mergers are ideal for larger farms and custom operators who depend on reliable and adaptable hay mergers to increase their operation's efficiency. These hay mergers are known for their versatility, with the ability to create a uniform windrow, using both center-, side- or split-delivery, in a wide variety of forages.

The center delivery concept offers operators up to eight different delivery options to create windrows that best fit their harvesting practices. Whether in heavy or light forages, baling or chopping, the MM 950 & 1090 can adapt to anything.

A standard, floating windguard automatically adjusts to differing crop volumes, while providing excellent guidance onto the center of the belt, creating a fluffy and consistent windrow. The small-diameter pickups allow for optimal forage collection in light, short crop as well as heavy, dense crop. Pickup speed can be adjusted based on the crop type to protect forage quality.

A spring suspension system promotes enhanced ground following and superior flotation. This design features four springs on each merger head, eliminating the need for complicated hydraulic requirements. Each head has a large pivoting angle of +/- 10° and a suspension range of 20" (0.5 m).

The AT-10 controller allows for user-friendly and simple operation, without compromising machine performance. The controller adjusts forage delivery, individual unit lift, belt pickups and folding from transport to the working position.

Kuhn North America, Inc., of Brodhead, Wisconsin, is a leading innovator in agricultural and industrial equipment. KUHN offers a broad range of hay and forage, livestock, and crop production tools, as well as landscape and road maintenance equipment. KUHN, KUHN Knight and KUHN Krause products are sold by farm equipment dealers throughout the United States, Canada and many other countries.
